

## **Why Hosted Exchange**

*Your organization can have a fully managed, outsourced enterprise level messaging system in as little as 1 week for under \$11 per month for a 1 GB mailbox!*

All Exchange hosted service plans include:

- Full-featured email and collaboration services of MS Exchange 2007
- Free downloadable copy of Outlook 2007 or Entourage 2008
- 24/7 live customer support and 99.99% SLA
- Account Management Portal
- Full protocol support (MAPI, IMAP, POP, OWA)
- Free 100MB company SharePoint site
- SPAM and email virus protection

E-mail has become a mission critical system for all businesses. The costs associated with implementing a robust, a high-demand, company-wide Exchange environment usually requires a large initial investment and ongoing costs to sustain around-the-clock availability. Today's small and medium sized businesses desire sophisticated messaging tools with features like robust SPAM and virus filtering, mobile access, and shared calendars and contacts. The costs and duration of the in-house Exchange email system implementation as prohibitive for many small and medium sized businesses in today's economy. Microsoft Hosted Exchange enables you to scale to fit your current business needs now and into the future, eliminates the onerous initial investment, provides an enterprise level communication platform in as little as 1 week, and monthly billing to free up valuable capital. The hosted model enables you to more effectively use in-house IT staff and, and other costly resources for more effective, strategic use within your organization.

- Low cost-of-ownership and cost predictability
- Rapid deployment
- Scale up or down as needed, with no extended risk
- Pay for the mailbox space used and active accounts
- Anytime, anywhere access to information
- Business-class messaging and collaboration
- Secure and reliable performance for the highest productivity
